In the two-year B.Ed. Programme, internship is the professional preparation of a prospective teacher. After focussing on the teaching aspects in the third semester (for 8 weeks), the last phase of school internship here is expected to prepare the prospective teachers for a holistic participation in the school situation. This will create a situation for the prospective teachers to undertake multiple job-roles of a teacher at a time and handle all of them with efficiency and commitment. This prepares them to feel the pressure and pleasure of performing multiple roles as a teacher, to feel how their participation makes a change among the learners and, thus, to develop a respect for the noble profession. The prospective teachers are expected to participate in teaching, evaluation, administrative tasks, conducting curricular activities, preparing learning material for catering students' needs as well as in a closer understanding of students in individual or in group through undertaking case studies, action research, etc. This phase of the school internship will again be of 8 weeks duration in the schools. The details of the tasks to be undertaken by the prospective teachers are as follows:

- **Case study/individual portfolio-(25 marks)** – Prospective teachers are expected to undertake this activity and complete it within the period. They may have a close observation on a single student or a small group during this period so as to produce a case study report or/and a portfolio reflecting a holistic understanding of these students. The aim is to bring the Prospective teachers as close as possible to the learners and their unique characteristics and their unique circumstantial problems. This in turn is expected to sensitise them about biological-psychological-social space of learners in which they are embedded and to enhance their self-efficacy as an effective problem solver as well as reflect upon maintaining an inclusive classroom situation and school ethos.
- **School participation-(25 marks)** – Prospective teachers are expected to participate in various school activities other than classroom teaching like the Morning assembly, conducting sessional tests, administrative works, etc. as and when allotted by the school and the teacher-in-charge.

This will include designing situations for diagnostic testing to assess learning and reflect upon the possible causes for it. This in turn will be an input for the remedial teaching designs as described in the preceding point. They are also expected to design the means for preparing strategies for assessing co-scholastic aspects and submit an evidence based detailed report.
- **Action research: (25 marks)**–The prospective teachers may identify some problem situation and undertake an action research to put effort to a practical solution for it. The aim

is to bring the Prospective teachers as close as possible to the learners and their unique characteristics and their unique circumstantial problems. This in turn is expected to sensitise them about biological–psychological–social space of learners in which they are embedded and to enhance their self–efficacy as an effective problem solver and as a teacher–a friend, philosopher and guide.

- **Administrative Work (attendance record/time table/ register/ stock/ exam duty, etc.)–(25 marks)** –Prospective teachers are expected to participate in the administrative functions also like a real teacher does in the school. This will include maintaining records like the attendance record, student record, registers, stock, etc. under the guidance of the school teachers. They should also participate in planning school activities through preparing different time tables and programmes. The overall experience through such participation during this phase is expected to prepare the prospective teachers for fulfilling various administrative responsibilities and inculcate leadership qualities.
