Score is calculated using the formula

$$Score = S_q + (S_r - S_q) \frac{(M - M_q)}{(\bar{M}_r - M_q)}$$

Score obtained by the candidate in the paper, mentioned on this score card in GATE 2017
 S_r = Top marks for general category candidate in the paper
 S_q = Marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper (in case of multiple sessions)
 M = Score assigned to M_r
 M_q = Score assigned to M_q

Score formula, M_q is usually 25 marks (out of 100) or $\mu + \sigma$, whichever is greater. Here μ is the mean and σ is the standard deviation of marks of all the candidates who appeared in the paper.
 GATE 2017 does not guarantee either an admission to a post-graduate program or a scholarship/assistantship.
 NCB may conduct further tests and interviews for final selection.
