

**List of Courses Focus on Employability/ Entrepreneurship/
Skill Development**

Department : Pure and applied physics

Programme Name : B.Sc. (Hon.) Physics

Academic Year : 2016-17

List of Courses Focus on Employability/ Entrepreneurship/Skill Development

Sr. No.	Course Code	Name of the Course
01.	BP-302	Basic Electronics
02.	BP-501	Optical instruments and techniques
03.	BP-604	Elements of Nano Science

Scheme and Syllabus

5 Year Integrated U.G. in Physics

Semester-I	Marks	Semester-III	Marks
BP-101 Mechanics & properties of matter	50	BP-301 Heat & Thermodynamics	50
BP-102 Electromagnetic Theory-I	50	BP-302 Basic Electronics	50
BP-103 Lab-I	50	BP-303 Lab-III	50
Semester-II	Marks	Semester-IV	Marks
BP-201 Kinematics and Oscillations	50	BP-401 Optics	50
BP-202 Electromagnetic Theory-II	50	BP-402 Modern Physics	50
BP-203 Lab-II	50	BP-403 Lab-IV	50
Semester-V	Marks	Semester-VI	Marks
BP-501 Optical instruments and techniques	50	BP-601 Atomic and Molecular Physics	50
BP-502 Mathematical Physics	50	BP-602 Basic Nuclear Physics	50
BP-503 Basic Quantum mechanics	50	BP-603 Solid State Physics-II	50
BP-504 Solid state physics-I	50	BP-604 Elements of Nano Science	50
BP-505 Lab-V	50	BP-605 Lab-VII	150
BP-506 Lab-VI	50	BP-606 Project Work	

Paper XXII (BP-604): Elements of Nanoscience

Unit I: Introduction to Nanoscience and nanotechnology Introduction to nanotechnology and importance of nanoscience, summary of electronic properties of atoms and solids (qualitative), Modifications in properties of materials due to nanoscale dimensions.

Unit II: Synthesis and characterization of nanomaterials Physical and Chemical Synthesis of Nanomaterials, Top – down approach (CVD) and Bottom – up approach (sol – gel process), wet – deposition techniques (spin coating and dip coating), Structure and imaging of nanomaterials: XRD, scanning and tunneling electron microscopies; & SPM (qualitative)

Unit III: Topics on some important classes of nanomaterials Metal Nanoparticles, Carbon Nanostructures – fullerene, carbon nanotubes and graphene (introduction); low dimensional semiconductors – 0D, 1D, 2D & 3D systems, quantum wells, wires and dots (introduction) - Quantum confinement in semiconductor nanostructures (qualitative) - The electronic density of states; Characterization of semiconductor nanostructures and applications of semiconductor nanostructures

Unit IV: Applications of nanotechnology Societal Implications of Nanoscience and Nanotechnology, important applications of nanomaterials (energy, sensors, electronics and medicine) and Future directions of nanotechnology

Text books:

1. Introduction to Nanotechnology, Charles P. Poole & Frank J. Owens
2. Introduction to Nanoscience and Nanotechnology, K.K.Chattopadhyay and A.N.Banerjee
