3. Regarding the subjects learned by the staff and its level of usage, in your organization, blease give opinion:

The staffs, that has been recruited from GGV has learnt cloud computing, backend and frontend development at our place. The overall satisfaction level of the company with the staff is 97% as 97% of the staff has completed the curriculum on time. In our opinion the university has much more potential to develop the learning spirit among the students, no matter it's academic learning or corporate skill training.

4. How could our programs be improved? What specific comments do you have regarding the curriculum?

The curriculum (mostly of Engineering), should include direct industry exposure such as working in a company sponsored project physically inside the campus or a government sponsored research project. In our opinion, the curriculum lacks a little bit of practical exposure, mostly for a corporate environment, where the students need to learn several other things and a certain threshold of skills. Overall curriculum is great, but with a small touch of the industry, it can be even better.

If you would like our assessment team members to contact you to discuss any issues please provide us your contact number.

How could our programs be improved? What specific comments do you have regarding the curriculum? The curriculum (mostly of Engineering), should include direct industry exposure such as working in a company sponsored project physically inside the campus or a government sponsored research project. In our opinion, the curriculum lacks a little bit of practical exposure, mostly for a corporate environment, where the students need to learn several other things and a certain threshold of skills. Overall curring is great,
