2. ABOUT THE INTERNSHIP

2.1 Introduction

In the summer of 2024, I had the opportunity to undertake an internship in web development at Codsoft Company. This internship provided a comprehensive introduction to the field of web development, combining practical experience with professional guidance in a real-world setting.

2.1.1 Internship Objectives

The primary objectives of my internship were to:

1. **Gain Practical Experience:** Apply theoretical knowledge of web development in a real-world environment.
2. **Develop Skills:** Enhance technical skills in frontend and backend development, including proficiency in various programming languages and frameworks.
3. **Contribute to Projects:** Assist in the development of live web applications and contribute to ongoing projects within the company.
4. **Understand Industry Practices:** Learn about industry standards, project management, and best practices in web development.

2.2 Tech Stack Used

The following are the tech stacks which I used to complete the project during the internship

2.2.1 HTML

HTML (Hypertext Markup Language) is the foundational technology used to create and structure content on the web. It provides the basic building blocks for web development by defining the structure of web pages using a system of tags and attributes. HTML is essential for creating and organizing content such as text, images, links, and multimedia elements on a webpage.
